Greenberg Freeman LLP concentrates its practice in providing litigation, dispute resolution and counseling services to individuals and businesses in many areas of the law. In every matter we handle, we strive to achieve the best possible outcome for our clients by performing outstanding work in a cost-effective manner.

- **THE BEST POSSIBLE OUTCOME:** Every problem, regardless of its size and complexity, requires a well-designed plan to achieve the desired result. Some matters require a full-scale litigation, while others can be resolved by nothing more than a telephone call or letter. Relying on a combined 30 years of legal experience, the attorneys at Greenberg Freeman LLP offer sound and practical advice combined with strong advocacy to help clients solve their problems and reach their goals.
- **OUTSTANDING WORK:** Solid execution is essential to achieving positive results for our clients. The attorneys at Greenberg Freeman LLP each were trained at prestigious national law firms working with some of the country's top lawyers on complex matters, after which they honed their skills at smaller firms, which provided both a wider variety of cases

Wainscott Compound

Located on a prime 4.4 acres of landscaped land, this custom designer home reflects that same quality and design sense that the craftsman owners employ in their work. This spacious 4,500 square foot home with 4 zone heat and air conditioning, filled with all the modern amenities, old-world quality finishes and craftsmanship feature an open floor plan that offers a warm and comfortable environment for the discerning individual.

The sun-drenched open interior space is filled with beautiful woods, leather installations, high quality custom hardware, and custom designed lighting throughout. The flooring throughout the house is Cypress, all doors, windows and trims are Mahogany.

Leather wrapped doors lead into the open architecture of the living space which features 24-foot beamed cathedral ceilings. The main floor of the house consists of the living, dining and open kitchen area; flanked by two in-suite guest rooms on the lower floor and 2 additional in-suite guest rooms in the lofted area overlooking the panoramic living space. Cypress flooring and mahogany trims are highlighted by exposed brick fire place and skylight ceiling.

The kitchen marries the modern clean lines of stainless steel, with 2 ¼ inch solid marble countertops and marble sink. Brushed nickel fixtures and Viking appliances, make this kitchen both high in design and ergonomic utility.

The spacious master bedroom suite, located in the southern wing of the home, is awash in sunlight from its three windowed exposures, French doors lead to the deck and private backyard and pool area. Its marble fireplace has built in storage for firewood. The master bathroom features a Jacuzzi, walk in shower with built in marble bench, separate room for the toilet and bidet, offering additional privacy. The 2 walk-in master closets feature built in leather dresser tops and drawers with ample space for hanging and shelves above. It's adjoining library provides a rich space to showcase a book collection.

All five and a half bathrooms are detailed in fine Italian marble, featuring windows with ample light and linen closets. Each bathroom's unique marble tiling and custom counters, custom chrome fixtures, cabinets and hardware come together in a simple and stylish form.

The house also includes a full basement. This space features a 9' x 16' square foot walk in cedar lined closet.

The exterior space features an 800 square foot cypress deck, which draws you out onto the manicured lawn and view of the 50' x 18' heated gunite pool. The property is fully protected by a deer fence. All garden areas and lawn are tended by in ground watering system.

The clapperboard cypress siding and deck have a naturally light honey color which turns to a warm grey with natural exposure. Cypress produces oil called cypress, which acts as a natural preservative within the wood. This inherent characteristic of the cypress makes it durable and extremely resistant to harsh weather conditions, insects and fungus.

All exterior doors, windows and casings are made from mahogany, for the house and garage, this wood is traditionally a favorite wood for European interiors and boats, as well as for making furniture. Both the house and detached garage feature high durability, beautiful copper gutters and runoffs.

The house and detached two car garage are built using the highest quality and standards. This is an amazing home, smartly designed and wonderfully crafted using the highest quality materials and methods - the perfect home to weekend in or settle in to for generations.

To make better; improve.

Wsup Peoples:

Dujeous, NYC's premier live hip-hop band, has received the prestigious title of "Unsigned Hype" in the June issue of hip-hop magazine The Source (with The Game on the cover), on newsstands now.

The crew has been doing their thing for years, rocking hundreds of shows across the globe, selling thousands of CDs, records and cassettes (yeah, they go back that far), and appearing on countless mixtapes, so this recognition is certainly well-deserved, even if it is long overdue.

Dujeous was also named as one of Urb Magazine's "Next 100" in 2004.

animal politics
- tom p

Howdy folks, it's been a while - sorry to keep you all sickened with a graphic description of my bodily functions thinly disguised as political commentary - I've been deep in thought the past few months, and haven't had time to write a new column.

As you may have guessed from our controversial extreme leftist super hit album "City Limits", the Dujeous collective doesn't shy away from...

angelos dosoulas

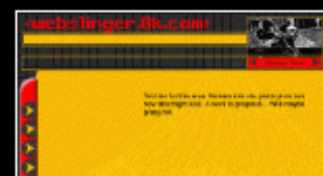

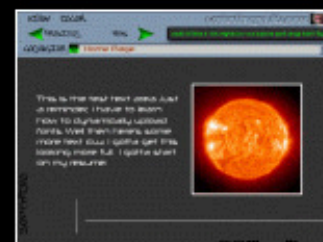

Welcome to my portfolio site. The goal of this site is to provide information about me and my work history, and to showcase my creativity.

The current idea for the site is to make it feel "skinnable". This will be accomplished by making different design versions of the site. The next step will be to create various color schemes for each look

I plan to continue this design structure, adding new looks as time goes on. So far two are completed, and four are in development.

My biggest concern is the nonstandard methods that browsers use to read stylesheets, and, more importantly javascripts. This proves very frustrating when creating sites. Optimizing for Internet Explorer is fine in some cases, but personally I do not use elements that are not cross browser compatible.
